# RHODE ISLAND STROKE SYMPOSIUM

## PROGRAM DESCRIPTION

The Rhode Island Stroke Symposium seeks to integrate the most advanced research and medical knowledge in the treatment of stroke and provide a forum for discussion and dissemination of that knowledge by advanced practice professionals, stroke neurologists and registered nurses at Rhode Island Hospital. This program will provide an update on the state-of-the-art in acute stroke treatment as practiced at a Comprehensive Stroke Center.

## TARGET AUDIENCE

Regional primary care and specialist physicians, including emergency physicians, neurologists, cardiologists, radiologists, surgeons, nurse practitioners, registered nurses, paramedics, pharmacists, physical therapists, occupational therapists, speech therapists, social workers, advanced practice professionals, residents, fellows, medical students and other allied members of the healthcare team.

## LEARNING OBJECTIVES

*At the conclusion of this activity, participants should be better able to:*

- Recognize the most important factors in preventing stroke
- Accurately identify the patient that warrants transfer to a tertiary stroke center
- Identify the indications and contraindications to mechanical thrombectomy for large vessel occlusion
- Describe the work-up for acute ischemic stroke with particular reference to acute ischemic stroke in the young person
- Recognize the role of the advanced practice professional in the treatment of acute stroke
- Describe disparities in stroke care and recognize factors that can be addressed to improve equity in stroke care
- Select patients who are appropriate for long-term cardiac monitoring
- State the indications and contraindication for the use of tissue plasminogen activator
