**Masks**
- **N95**
- **Gown**
- **Face shield or goggles**
- **HH Gloves**

**Gloves**
- **Nitrile**
- **Clean and disinfect room surfaces and equipment as often as needed—NOTE PRODUCT CONTACT TIME FOR EFFECTIVE DISINFECTION.**
- **Limit supplies and equipment to essentials only—dedicate equipment of follow disinfection policies for reusable equipment.**
- **Limit entry to essential personnel and purposes only—Limit time spent in room.**
- **In assigned areas, staff wear one surgical or procedural mask continuously for a maximum of 4 hours.**
- **After use or if a mask appears to be compromised (torn, wet, mishapen), staff should remove, discard the mask and replace it with a new one.**
- **Staff should wear a loop/face mask over any N95 or KN95 to prevent contamination when splash or aerosolization is likely, as in AGPs.**
- **Discard mask if contaminated with blood, respiratory or nasal secretions, or other bodily fluids from patients.**
- **Discard mask following close contact with or exit from, the care area of any patient PUI/COVID and co-infected with MDRO, influenza, C diff, etc.**
- **HCP must take care not to touch their facemask. If facemask is touched or adjusted, hand hygiene must be performed immediately.**
- **Perform hand hygiene with soap and water or an alcohol-based hand sanitizer before donning PPE and after touching or adjusting the mask (if necessary for comfort or to maintain fit).**
- **HCP should leave the clinical care area if they need to remove facemask.**
- **Cloth masks are not PPE and are not sufficient in clinical areas.**

**Extended use of N95 masks—follow guidelines above AND**
- **Inspect for integrity and seal-check fit prior to use.**
- **Reusable N95 masks can be stored between uses in a clean sealable paper bag or breathable container with identification label.**
- **If mask is removed during shift label & store appropriately (see N95 Reuse Workflow).**
- **Reusable N95 masks may be re-used up to 5x and discarded after 12 hours cumulative use time.**
- **Apply face shield over N95 for PUI/COVID+ and disinfect after use.**

**Eye protection**
- **Eye protection is required whenever within 6 ft. of others unless barrier in place.**
- **Eyeglasses are not considered eye protection—they are NOT PPE and do not offer sufficient protection!**
Follow all general guidelines above and specific guidelines below:

### Staff that do not enter a patient care room

- Caregiver seeing a patient who requires an aerosol generating procedure (see page2)
  - N95 Mask
  - Face shield or goggles
  - Hand hygiene Gloves
  - Gown

- Clinical caregivers obtaining nasopharyngeal (NP) or oropharyngeal (OP) swab
  - N95 Mask
  - Face shield or goggles
  - Hand hygiene Gloves
  - Gown

- Caregiver seeing a patient who requires an aerosol generating procedure (see page2)
  - N95 Mask
  - Face shield or goggles
  - Hand hygiene Gloves
  - Gown

- Staff that do not enter a patient care room (i.e., exam, treatment, procedure)
  - Face mask
  - Face shield or goggles

1. For the purposes of obstetrical care, C-section or induction of labor cases are scheduled, medically indicated procedures. In the circumstance of a COVID19 positive test result or COVID19 pending test result, the scheduled procedure will proceed with appropriate PPE.

2. For the purposes of obstetrical care, prenatal pre-procedural Covid-19 testing will be done at 48-72 hours prior to scheduled appointment on L&D. Patients are counselled by their OB provider to self-isolate following outpatient testing.
