Bereavement Services

You need not walk this path alone!

Bereavement Services in the Community

Grieving is an important emotional process for all those who suffer a loss. Although grief is normal, it can be a distressing and often confusing time in one's life as it can affect every aspect of a person's day-to-day life. People express their grief in different ways and according to their own unique time schedules, but no matter how we do it, grieving is an important part of the healing process after experiencing the death of someone who was a major part of our life.

At Southcoast VNA Supportive Care Center, we believe that you need not walk alone through the journey of grief. Our Grief Support Groups and Workshops are wonderful ways to gain peer support and companions along the journey through grief. A variety of support groups and workshops are offered throughout the year and are free and open to the public.
